

Unscramble the 5-letter word in each box. One of the clues will match your new word. Put the number of that clue into the small box and write the new word on the dash. Write the first letter of your new word on the correspondingly numbered dash at the bottom of the page to discover the hidden message. The numbers in each row and column will add up to 65. To start you off, we have put in one word and its clue number and set the first letter on the proper dash at the bottom of the page.
