

## Down

- |   |                                     |
|---|-------------------------------------|
| 1. 'Of the snow'  | 31. Auricle                         |
| 2. Gr. 'wing'   | 33. No. of hematophagic species     |
| 4. Existent   | 34. Largest taxa                    |
| 5. Nursery  | 35. Spiny, tropical fruit           |
| 6. Phyllostomidae architecture                                  | 36. Taxonomic order                 |
| 7. Common overwintering strategy                                | 38. Preference                      |
| 9. Exhibit nocturnal anthesis and intense scent                 | 40. Fleshy, external ear projection |
| 10. Knowledge _____   | 42. Acidic landform                 |
| 14. Cartilaginous spur  | 45. Hibernacula direction, perhaps  |
| 16. Pregnancy   |                                     |
| 17. Call component  |                                     |
| 19. Calls by young that communicate location and identification |                                     |
| 21. Predominant foraging strategy                               |                                     |
| 23. Fisherman   |                                     |
| 24. Altruism with expectations                                  |                                     |
| 26. Mass of indigestible fibrous material                       |                                     |
| 28. <i>Geomyces destructans</i>                                 |                                     |
| 29. <i>Desmodus</i> , <i>Diaemus</i> , <i>Diphylla</i>          |                                     |

## Across

- |  |                              |
|--|------------------------------|
| 3. Seasonal migration _____ 50 km            | 41. Seasonal fuel            |
| 8. Prey flight                               | 43. Sensory orientation      |
| 9. 'Big bang' canopy fruit                   | 44. Wind farm COD            |
| 11. Vesper                                   | 45. Disrupts homeostasis     |
| 12. <i>Mystacinidae</i> , e.g.               | 46. Valencia heraldic symbol |
| 13. Region of highest diversity              | 47. Mediterranean rhinolphid |
| 15. Short-term dominance                     | 48. Echolocators             |
| 17. Aerial locomotion                        | 49. Sonar jamming, e.g.      |
| 18. Population sans immunological protection |                              |
| 20. Interferental membrane                   |                              |
| 22. <i>Plecotus auritus</i> , e.g.           |                              |
| 24. Foliage, e.g.                            |                              |
| 25. 'Tree of Life'                           |                              |
| 27. Fruit flesh                              |                              |
| 29. Flight                                   |                              |
| 30. Asb-guy                                  |                              |
| 32. Anthropogenic roosts                     |                              |
| 34. Multiple                                 |                              |
| 37. Countersubjug, e.g.                      |                              |
| 39. 'Of the evening'                         |                              |
